ALBANIA

## **The Albanian Litigation civil process implemented with the amendments Law no. 38/2017**

The most important part, as same as the administrative process, consist in carrying out all the necessary preparatory actions of the proceeding in written form, before the first court hearing, as assigned by the judge, take place.

According to these steps, the plaint, all together with the evidence as well as the defense statement with the evidences attached, should be notified to the parties by mail or e-mail, before the first hearing session.

The same method should be applied also for all the preparatory actions and the expertise.

The major purpose of this new procedure is to reduce the number of court hearing sessions for each case in only one hearing (except specific cases where is needed the gathering of other evidence, like witness, etc.).

In this light, the new reform has brought a fundamental reduction of the court hearings and therefore leading in one hand in a reduction of the court proceeding duration, and on the other hand the judges will have the opportunity to have more time in order to give the needed focus to different cases and to study each and every circumstance, so to optimize the result in better motivated and argued judgments.
